PRICE LIST -:- SEASON 1925-26

Rose Mound Nursery

B. C. KINLEY & SON, Props.

Salesyard, Roberts Ave., South of Third Street Bridge
SANTA ROSA, CALIFORNIA

NURSERY LOCATED AT TRENTON, CAL.

TO CUSTOMERS

We take pleasure in submitting to the kind consideration of our customers and friends our list for the season 1925-26.

A most cordial invitation is extended to all, whether intending purchasers or not, to visit our nurseries and examine the exceptionally fine stock of fruit trees we offer for sale this season.

We have for many years given our personal attention to the study of the most favored varieties for this section of the country, and it will be found that all these kinds have proven satisfactory for Sonoma and adjoining counties.

We exercise the utmost care to have our trees true to label. However, mistakes may occur. In case of error it is mutually agreed between the purchaser and ourselves that we will be liable for no sum greater than that originally paid for the trees.

TERMS OF BUSINESS

SHIPPING SEASON—We begin shipping as soon as sufficient rain has fallen to enable us to dig our stock, generally about December 15.

PACKING—Our packing is done in the best possible manner by competent men. All orders for \$10 or more will be packed free of charge. On all smaller orders we make a charge only sufficient to cover actual cost of labor and material used.

TERMS AND PRICES—Thirty days net to responsible parties unless otherwise arranged before shipment. Orders from parties unknown to us must be accompanied by cash in full. We will ship C. O. D. when 20 per cent of the amount of the order accompanies it. Prices named in this list are net and subject to change without notice.

BASIS OF THE SIZES AND CALIPER MEASUREMENTS FOR TREES

On all deciduous fruit trees, except Figs, the caliper and height combined determine the grade of the tree.

Not less than $\frac{1}{2}$ inch represents 4 to 6 ft. trees.

Not less than $\frac{3}{4}$ inch represents 3 to 4 ft. trees.

Not less than $\frac{1}{4}$ inch represents 2 to 3 ft. trees.

Figs are inclined to grow stocky, and the caliper measurements will govern the grade regardless of the height of the tree.

FIGS

Not less than $\frac{5}{8}$ inch represents 4 to 6 ft. trees.

Not less than $\frac{1}{2}$ inch represents 3 to 4 ft. trees.

Not less than $\frac{3}{8}$ inch represents 2 to 3 ft. trees.

Stocks mentioned in this list will be furnished as follows: 5 of a variety at the 10 rate; 50 at the 100 rate; 300 at the 1000 rate.

APPLE
